## MISSION

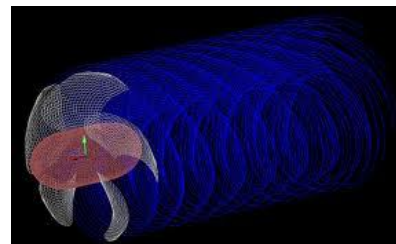

We provide on a consistent basis a wide range of marine services to Ship Owners and Operators.

We offer tailor-made solutions to meet the Clients' expectations, keeping pace with industry best practice according to the highest standards of quality and safety.

## Hydrodynamics Test

Execution of tests in the Froude's channel for the determination of the resistance of models of ships mono-hulls and multi-hulls.

Execution of propellers' tests in the Cavitation Tunnel.

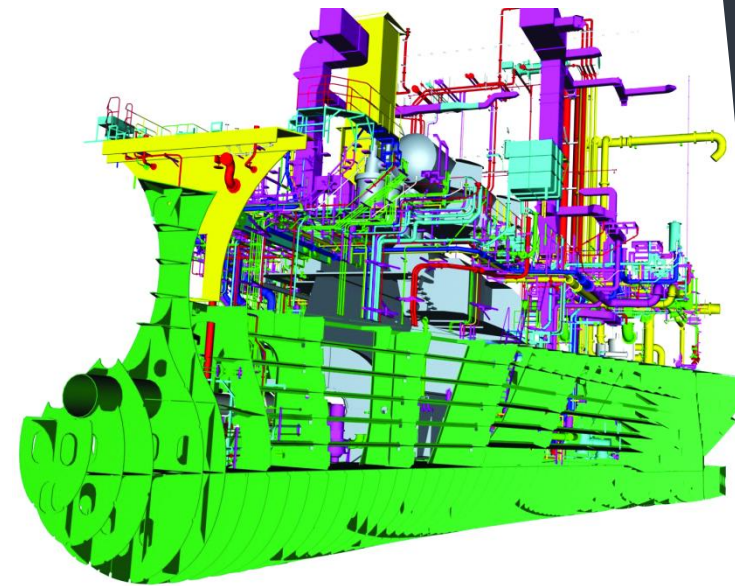

## Design & Engineering

**M.A. Marine Surveyors and Technical Consultants** has developed strengths in conceptual, basic and detailed design. Our focus is to help achieve the right balance in terms of design and operational capability for the vessel.

We possess in-house competence for core activities such as:

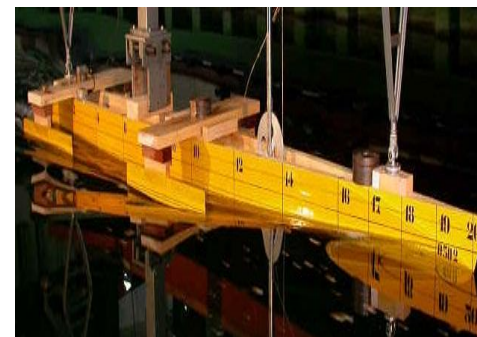

- Conceptual Design
- Basic / Initial Design
- Production / Detailed Design
- Offshore Engineering
- Vessel Conversion Design
- Design Modification
- Vessel Hull Modeling
- Vessel Structural Analysis
- CFD (computational fluid dynamic)
- FEM Calculation
- Drawings' plan approval (RINA, ABS, BUREAU VERITAS, DNV, LLOYD'S REGISTER)

## Marine Consultancy

**M.A. Marine Surveyors and Technical Consultants** provides Marine Consultancy services using its wide range of staff skills and comprehensive array of specialist software. Projects can be taken on covering complex cross disciplinary subjects, taking advantage of the extensive experience of key staff. Typical consultancy projects would include:

- Development of hulls
- Market assessment of specialist equipment
- Engineering studies of marine operations
- Model testing
- Stability calculations
- Inclining tests
- Motion response studies
- Model testing
- Stability calculations
- Inclining tests
- Motion response studies

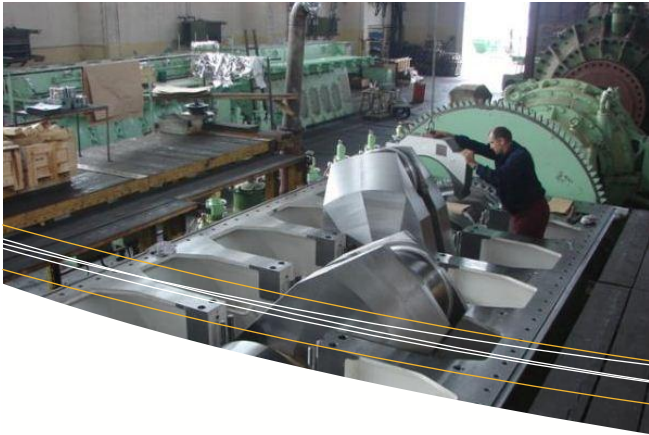

## PERSONNEL

Core personnel of the company are highly qualified Naval Architects and Engineers with a wealth of knowledge in the technical and operational aspects of ships. The Company can therefore vouch unreservedly for the professional competence and personal character of all the
